Cultural sheet: Cauliflower F1 Baby

Species	
Brand Name	Cauliflower F1 Baby
Species	Brassica oleracea botrytis var. botrytis
Trade name species	Cauliflower
Туре	Annual
Family	Cruciferae
Seed weight	2,2-4 gram / 1000 sds depending on seed lot
EU variety name	PMHC927075
Young Plant	
Germination days	3 days (max 2 nights)
Germination temp.	18°C – 64°F Covered and high humidity, no light needed
Grow on days	35 (5 weeks)
Grow on temp.	18°C – 64°F
Min. Grow on temp.	8°C – 46°F (This enlarges the Grow on days period)
Optimal D/N temp.	20°C -14°C
Soil for sowing	Sowing soil with good drainage, EC 1,5 PH 5,8-6,5
Soil for sowing covering	Vermiculite / soil with open structure /app. 4-8 mm thick
Fertilisation in the plug	1,5 EC with each watering, low Nitrogen
Ready to transplant	2 large leaf's and central sprout start to stretch
Reday to transplant	Roots cover the whole plug
Attention points during	Plants may never go limp. This encourage generative phase and follows with too early
young plant growing	curd production.
7 6 6	Preventive insect protection with spraying against cabbage-fly, swede-midge
Finish for grower	
Potting soil	Standard soil with good drainage but also good water storage capabilities
	EC 1,5 PH 5,8-6,5
Pot-size	8-12 cm 3"-5"
Pot-size Plants per pot	
	8-12 cm 3"-5"
Plants per pot Min. Grow on temp.	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period)
Plants per pot Min. Grow on temp. Ideal grow on temp.	8-12 cm 3"-5" 1
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp.	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C
Plants per pot Min. Grow on temp. Ideal grow on temp.	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp.
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp.	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp.
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature)
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures.
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures.
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing Consumer use	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C– 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures. Pay attention to cabbage-fly, swede-midge, aphids and butterfly-eggs
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing Consumer use Use	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C– 46°-75°F 20°C-14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures. Pay attention to cabbage-fly, swede-midge, aphids and butterfly-eggs Nutrition vegetable for fresh snack and cooking, sweet after taste
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing Consumer use Use Cooking time	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures. Pay attention to cabbage-fly, swede-midge, aphids and butterfly-eggs Nutrition vegetable for fresh snack and cooking, sweet after taste 7-9 minutes
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing Consumer use Use Cooking time Stir frying	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures. Pay attention to cabbage-fly, swede-midge, aphids and butterfly-eggs Nutrition vegetable for fresh snack and cooking, sweet after taste 7-9 minutes 3-5 minutes, cut in small parts
Plants per pot Min. Grow on temp. Ideal grow on temp. Optimal D/N temp. Watering Crop time to finish Attention points during plant growing Consumer use Use Cooking time Stir frying	8-12 cm 3"-5" 1 8°C-42°F (This enlarges the Grow on days period) 18°C-24°C- 46°-75°F 20°C -14°C Regularly, keep the soil moist, never let the plant go limp. Watering with mini. 1,5 EC 24 days (4 weeks) (depends on temperature) Variety is not sensitive for delay due to high temperatures. Pay attention to cabbage-fly, swede-midge, aphids and butterfly-eggs Nutrition vegetable for fresh snack and cooking, sweet after taste 7-9 minutes 3-5 minutes, cut in small parts Mini curd for small family meal
